

...your first choice

Combining exceptional local knowledge, the customer service and attention you expect from a business based on family values and the outstanding technical expertise you would demand from a leading manufacturer of quality animal feeds, Harpers Feeds are trusted by farmers across the South West.

We know all farms have different requirements so pride ourselves on having products to suit all systems and for all species, whether ruminant or monogastric. We manufacture compounds and blends and supply straights, supplements and speciality feeds as well as forage seeds and additives. Feeds are available in an extensive range of physical forms and pack sizes to give exceptional choice.

All manufactured feeds are supplied as fixed formulations so you know the next load will be the same as the last, ensuring consistent performance.

Whatever your requirements, Harpers Feeds can provide feeding solutions to deliver outstanding performance.

Product	Protein	
Horse & Pony Nuts	11%	At rest or in light work
Country Cool Mix	11%	Light to medium work
Conditioning Mix	13%	Improving condition
Performance & Stud Mix	15%	Show, stud, hunters & hard work

Prohibited substances in competition

Most medicines and drugs are prohibited and should be avoided at time of competition. More information can be obtained from FEI (www.horsesport.org) and the Horseracing Regulatory Authority (www.thehra.org).

Harpers Horse Feeds are manufactured from quality ingredients which are acquired from assured sources and are fully traceable from boat, factory, storage or farm of origin. Hygiene controls and process systems in our plant are audited annually under the UFAS scheme to HACCP principles.

Due to the nature of some naturally occurring prohibited substances, it is not possible to guarantee that Harpers horse feeds are free from prohibited substances.

If you are concerned about banned substances, you should seek advice from the governing body of your discipline or your veterinary surgeon.

Focused on horse nutrition

Your horses deserve the best. At Harpers Feeds we have used our considerable experience in equine nutrition to develop a range of quality feeds which provides cost-effective solutions to your horses' and ponies' nutritional requirements.

All our horse mixes are manufactured with a light coating of Mol-Glo, a blend of molasses and soya oil which increases palatability and improves texture.

They also include all the minerals and vitamins your horse needs with added Biotin to ensure healthy hooves and skeletal formation and maintenance.

Yeast is also included to aid digestibility and reduce lactic acid accumulation, maintaining the correct pH of the hind gut.

Harpers Horse Feeds are trusted by owners across the south west.

Horse and Pony HDF nuts

A cost-effective, nutritionally balanced low energy cube, manufactured from quality ingredients to help meet the nutritional requirements of horses and ponies at rest and in light work.

With a low energy and sugar content, these cubes make an ideal daily feed for horses and ponies prone to laminitis and for native breeds who gain weight easily. Cal-Mag is added to improve magnesium intake and rectify deficiencies often found in grazing.

Formulated with a high digestible fibre content, these cubes are perfect for use where a 'slow burn' effect is required with animals that are inclined to get excitable on higher energy feeds.

For older horses and ponies who find long fibre difficult to chew these cubes can be soaked and fed as a mash.

Country Cool Mix

Using a quality blend of ingredients including cooked cereals, and with a slightly higher energy and sugar content than Horse and Pony HDF Nuts, this mix is intended for horses and ponies in light and medium work. It is also suited to use as a maintenance diet while at rest and where a little more energy is required to maintain good condition e.g. in winter.

A great all-round diet which is non-heating and provides a palatable and nutritionally balanced feed.

Conditioning Mix

A premium mix containing a high concentration of cooked cereals and cooked linseed to improve condition and coat shine without 'fizz' for poor doers. It is ideal for adding top-line for showing stock and is also excellent for providing controlled energy in the dressage ring.

It is a highly palatable and appealing mix containing 'sweeties', like locust beans, which will tempt even the shyest feeders. Micronized flaked peas and the inclusion of our own formulation and manufactured protein nuts deliver good levels of quality proteins. Micronized maize and barley ensure a good supply of slow-release controllable energy.

Performance and Stud Mix

A high energy blend of micronized cereals and quality proteins to provide optimum nutrition in a highly digestible form. This makes an ideal daily feed for performance horses such as hunters, eventers and horses in hard work.

It is extremely palatable and high in quality proteins which ensure healthy growth in foals and younger stock. It meets the requirements of brood mares during late pregnancy and lactation.

All Harpers horse feeds are available in convenient 20kg bags and can be delivered direct to the customer or via our merchants.
